Mathematics Part – II

WORKBOOK

STD. IX (English Medium)

Salient Features

- ⇒ Includes all textual Problem Sets
- ⇒ Covers all Intext and Activity/Project based questions from the textbook
- ⇒ Includes adequate space to write the answers
- ⇒ Tentative marks allocation for all problems
- ⇒ Includes Important Theorems and Formulae at the end of the book

PREFACE

Target's "**Mathematics Part - II Workbook: Std. IX**" is an excellent resource for students seeking to enhance their preparation for examinations.

Our basic premise for this book is to retain the outline of the content as textbook to facilitate students to keep their practice material together and have a single point of reference for revision.

The book includes formula section at the end as quick revision tool for the solving problems.

Tentative marks have also been allocated to the questions. However, marks mentioned are indicative and are subject to change as per Maharashtra state board's discretion.

A book affects eternity; one can never tell where its influence stops.

Best of luck to all the aspirants!

Publisher

Edition: First

The journey to create a complete book is strewn with triumphs, failures and near misses. If you think we've nearly missed something or want to applaud us for our triumphs, we'd love to hear from you.

Disclaimer

This reference book is transformative work based on 'Mathematics Part - II; Reprint: 2022' published by the Maharashtra State Bureau of Textbook Production and Curriculum Research, Pune. We the publishers are making this reference book which constitutes as fair use of textual contents which are transformed by adding and elaborating, with a view to simplify the same to enable the students to understand, memorize and reproduce the same in examinations.

This work is purely inspired upon the course work as prescribed by the Maharashtra State Bureau of Textbook Production and Curriculum Research, Pune. Every care has been taken in the publication of this reference book by the Authors while creating the contents. The Authors and the Publishers shall not be responsible for any loss or damages caused to any person on account of errors or omissions which might have crept in or disagreement of any third party on the point of view expressed in the reference book.

© reserved with the Publisher for all the contents created by our Authors.

No copyright is claimed in the textual contents which are presented as part of fair dealing with a view to provide best supplementary study material for the benefit of students.

CONTENTS

No.	Topic Name	Page No.
1	Basic Concepts in Geometry	1
2	Parallel Lines	25
3	Triangles	42
4	Constructions of Triangles	77
5	Quadrilaterals	93
6	Circle	133
7	Co-ordinate Geometry	159
8	Trigonometry	176
9	Surface Area and Volume	196
	Important Theorems and Formulae	223

Sample Content

Let's Learn

Activity:

1. Points A, B, C are given below. Check, with a stretched thread, whether the three points are collinear or not. If they are collinear, write which one of them is between the other two.

\dot{A} \dot{B} \dot{C}
 A B C

(Textbook pg. no. 4)

Ans:

2. Given below are four points P, Q, R, and S. Check which three of them are collinear and which three are non collinear. In the case of three collinear points, state which of them is between the other two.

\dot{Q} \dot{S}
 \dot{R}
 \dot{P}

(Textbook pg. no. 4)

Ans:

3. Students are asked to stand in a line for mass drill. How will you check whether the students standing are in a line or not ?

(Textbook pg. no. 4)

Ans:

4. How had you verified that light rays travel in a straight line? Recall an experiment in science which you have done in a previous standard.

(Textbook pg. no. 4)

Ans:

Practice Set 1.1

1. Find the distances with the help of the number line given below.

[1 Mark each]

i. $d(B, E)$

Solution:

Handwritten solution area for part (i) consisting of several horizontal dashed lines for writing.

ii. $d(J, A)$

Solution:

Handwritten solution area for part (ii) consisting of several horizontal dashed lines for writing.

iii. $d(P, C)$

Solution:

Handwritten solution area for part (iii) consisting of several horizontal dashed lines for writing.

iv. $d(J, H)$

Solution:

Handwritten solution area for part (iv) consisting of several horizontal dashed lines for writing.

Page no. **3** to **9** are purposely left blank.

To see complete chapter buy **Target Notes** or **Target E-Notes**

iii. seg BE and seg AD
Solution:

2. Point M is the midpoint of seg AB. If $AB = 8$, then find the length of AM. [2 Marks]
Solution:

3. Point P is the midpoint of seg CD. If $CP = 2.5$, find $l(CD)$.

[2 Marks]

Solution:

4. If $AB = 5$ cm, $BP = 2$ cm and $AP = 3.4$ cm, compare the segments.

[2 Marks]

Solution:

5. Write the answers to the following questions with reference to the figure given below:

[1 Mark each]

i. Write the name of the opposite ray of ray RP

Ans:

ii. Write the intersection set of ray PQ and ray RP.

Ans:

iii. Write the union set of ray PQ and ray QR.

Ans:

iv. State the rays of which seg QR is a subset.

Ans:

v. Write the pair of opposite rays with common end point R.

Ans:

vi. Write any two rays with common end point S.

Ans:

vii. Write the intersection set of ray SP and ray ST.

Ans:

6. Answer the questions with the help of figure given below.

i. State the points which are equidistant from point B.

[2 Marks]

Ans:

ii. Write a pair of points equidistant from point Q.

[2 Marks]

Ans:

iii. Find $d(U, V)$, $d(P, C)$, $d(V, B)$, $d(U, L)$.

[2 Marks for each distance]

Ans:

Blank writing area with horizontal dashed lines and a vertical dashed line down the center.

 Practice Set 1.3

1. Write the following statements in 'if-then' form. [1 Mark each]

i. The opposite angles of a parallelogram are congruent.

Ans:

Blank writing area with horizontal dashed lines and a vertical dashed line down the center.

ii. The diagonals of a rectangle are congruent.

Ans:

Blank writing area with horizontal dashed lines and a vertical dashed line down the center.

iii. In an isosceles triangle, the segment joining the vertex and the midpoint of the base is perpendicular to the base.

Ans:

Blank writing area with horizontal dashed lines and a vertical dashed line down the center.

**2. Write converses of the following statements.****[1 Mark each]**

- i. The alternate angles formed by two parallel lines and their transversal are congruent.

Ans:

- ii. If a pair of the interior angles made by a transversal of two lines are supplementary, then the lines are parallel.

Ans:

- iii. The diagonals of a rectangle are congruent.

Ans:

Problem Set – 1**1. Select the correct alternative answer for the questions given below.****[1 Mark each]**

- i. How many midpoints does a segment have?

(A) only one (B) two (C) three (D) many

Ans:

- ii. How many points are there in the intersection of two distinct lines?

(A) infinite (B) two (C) one (D) not a single

Ans:

- iii. How many lines are determined by three distinct points?

(A) two (B) three (C) one or three (D) six

Ans:

- iv. Find $d(A, B)$, if co-ordinates of A and B are -2 and 5 respectively.

(A) -2 (B) 5 (C) 7 (D) 3

Ans:

- v. If $P - Q - R$ and $d(P, Q) = 2$, $d(P, R) = 10$, then find $d(Q, R)$.

(A) 12 (B) 8 (C) $\sqrt{96}$ (D) 20

Ans:

2. On a number line, co-ordinates of P, Q, R are 3, - 5 and 6 respectively. State with reason whether the following statements are true or false. [2 Marks each]

i. $d(P, Q) + d(Q, R) = d(P, R)$

Solution:

A large area of horizontal dashed lines for writing the solution to part (i). A vertical dashed line runs down the center of this area.

ii. $d(P, R) + d(R, Q) = d(P, Q)$

Solution:

A large area of horizontal dashed lines for writing the solution to part (ii). A vertical dashed line runs down the center of this area.

iii. $d(R, P) + d(P, Q) = d(R, Q)$

Solution:

iv. $d(P, Q) - d(P, R) = d(Q, R)$

Solution:

3. Co-ordinates of some pairs of points are given below. Hence find the distance between each pair.

[1 Mark each]

i. 3, 6

Solution:

ii. -9, -1

Solution:

iii. $-4, 5$

Solution:

iv. $0, -2$

Solution:

v. $x + 3, x - 3$

Solution:

vi. $-25, -47$

Solution:

5. Answer the following questions.

[1 Mark each]

i. If $A - B - C$ and $d(A, C) = 17$, $d(B, C) = 6.5$, then $d(A, B) = ?$

Solution:

ii. If $P - Q - R$ and $d(P, Q) = 3.4$, $d(Q, R) = 5.7$, then $d(P, R) = ?$

Solution:

6. Co-ordinate of point A on a number line is 1. What are the co-ordinates of points on the number line which are at a distance of 7 units from A ? [3 Marks]

Solution:

7. Write the following statements in conditional form. [1 Mark each]

i. Every rhombus is a square.

Ans:

ii. Angles in a linear pair are supplementary.

Ans:

iii. A triangle is a figure formed by three segments.

Ans:

iv. A number having only two divisors is called a prime number.

Ans:

8. Write the converse of each of the following statements.

[1 Mark each]

i. If the sum of measures of angles in a figure is 180° , then the figure is a triangle.

Ans:

ii. If the sum of measures of two angles is 90° , then they are complement of each other.

Ans:

iii. If the corresponding angles formed by a transversal of two lines are congruent, then the two lines are parallel.

Ans:

iv. If the sum of the digits of a number is divisible by 3, then the number is divisible by 3.

Ans:

9. Write the antecedent (given part) and the consequent (part to be proved) in the following statements.

[2 Marks each]

i. If all sides of a triangle are congruent, then its all angles are congruent.

Ans:

ii. The diagonals of a parallelogram bisect each other.

Ans:

10. Draw a labelled figure showing information in each of the following statements and write the antecedent and the consequent. [3 Marks each]

i. Two equilateral triangles are similar.

Ans:

Handwriting practice area for question i, consisting of a vertical dashed line and horizontal dashed lines.

ii. If angles in a linear pair are congruent, then each of them is a right angle.

Ans:

Handwriting practice area for question ii, consisting of a vertical dashed line and horizontal dashed lines.

iii. If the altitudes drawn on two sides of a triangle are congruent, then these two sides are congruent.

Ans:

Handwriting practice area for question iii, consisting of a vertical dashed line and horizontal dashed lines.
